

# goJim B2B Dashboard User Guide

---

Welcome to the **goJim Premium Gym Management Dashboard**! This comprehensive tool allows you to seamlessly manage your entire gym operations, from member tracking to trainer assignments and CRM.

## 1. Executive SaaS Business KPIs

---

The dashboard includes a powerful section for real-time unit economics analysis to help owners evaluate marketing performance and customer value.

## Key Metrics Explained:

- **Marketing Ad Spend & New Members Closed:** Use the interactive sliders to input your monthly marketing spend and the number of new members acquired.
- **Customer Acquisition Cost (CAC):** Calculated automatically by dividing the total Marketing Ad Spend by the number of New Members Closed. This shows how much it costs to acquire a single customer.
- **Lifetime Value (LTV):** The total predicted revenue a member will generate during their relationship with your gym.

**Note on LTV:** Currently, the LTV is calculated based on a fixed unit baseline formula: *Average Monthly Membership (₹115) × Average Retention Span (6.0 Months)*. Because this relies on your gym's historical baseline averages rather than dynamic monthly inputs, the LTV remains constant at ₹690.00 while the CAC fluctuates.

- **LTV to CAC Ratio:** This ratio determines the health of your marketing. A ratio of 3.0x or higher indicates excellent health (you are earning 3x what you spend to acquire a member).
- **Retention Cohorts Matrix:** Tracks the percentage of members retained over subsequent months. High drop-off months are flagged to alert you to retention issues.

## 2. Role Switching

---

At the bottom of the left sidebar, you will find a **Role Switcher** widget. This allows you to view the dashboard from different perspectives based on your staff permissions:

- **Gym Owner:** Full access to all top-level tabs.
- **Trainer:** Restricted view tailored to managing clients.
- **Student/Member:** Restricted view to view plans and rate trainers.

## 3. Gym Owner View

---

### 3.1 Overview Dashboard

---

The default screen upon logging in. Here you will find Quick Actions, Key Metrics, and the Activity Log.

### 3.2 Leads CRM

---

Track potential new members through a Kanban-style pipeline (New Leads -> Trial Booked -> Trial Done -> Converted).

## 4. Trainer Management

---

Click on **Add Trainer Profile** to onboard a new staff member. On the Trainer's card, click the assigned students number to view a detailed client list.

## 5. Front Desk Kiosk Mode

---

The **Kiosk Mode** button launches a self-service check-in screen where members can type their phone number to check in.
